

THE WASTE AND RECYCLING PROCESS

PAPER

METAL

PLASTIC

E-WASTE

GLASS

ORGANIC

1. CUSTOMER SORTING

Customer sorts and separates recyclable material from waste.

2. COLLECTION

LRS collects waste and recycling separately and takes it to cutting-edge facilities for sorting.

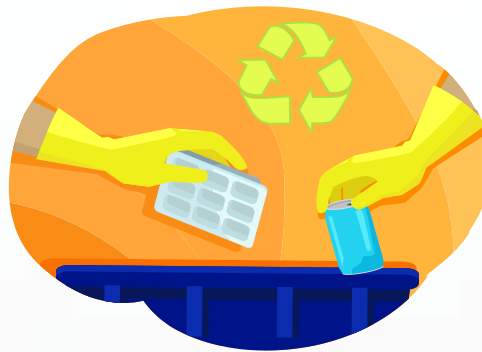

3. SORTING AT FACILITIES

LRS utilizes both employees and automated machinery to maximize diversion to ensure we are able to recycle as much material as possible. LRS diverts up to 90% of material that would normally be taken to landfills.

CLEAN PLANET

5. RECYCLING IS MARKETED

Recycled material is repurposed as new items to be bought or used again by the public.

4. RECYCLING MATERIAL

Once material is sorted and separated, recyclable material is sold to be turned into raw material. Residuals that cannot be recycled are taken to a landfill.
